

January 2008 Update

The Department is continuing to work on amendments to the OSC rules. During this process, the Department identified several regulatory and statutory issues that must be resolved before the rulemaking can proceed. Currently, a bill proposed in the Arizona Legislature, House Bill 2367, may affect the definition of an outpatient surgical center. The Department will continue with the rulemaking and a draft will be posted on this website when this statutory issue is resolved.

The timeline for this rulemaking has been removed. An updated timeline will be posted on this webpage when a draft is ready for public comment. Please continue to check this webpage for more information.
